3. Maintenance

Proper maintenance ensures the longevity and optimal performance of your Mini PC.

3.1 Cleaning

- Use a soft, dry cloth to clean the exterior of the Mini PC.
- For dust accumulation in vents, use compressed air. Ensure the PC is powered off before cleaning.
- Avoid using liquid cleaners directly on the device.

3.2 Storage

- Store the Mini PC in a cool, dry environment away from direct sunlight and extreme temperatures.
- If storing for an extended period, ensure it is powered off and disconnected from the power source.

3.3 Upgrades

The KAMRUI Hyper H1 Mini PC offers upgrade options for memory and storage.

- **RAM:** The device has two SO-DIMM DDR5 slots and supports up to 64GB of DDR5 RAM.
- **SSD:** It features two M.2 2280 slots, supporting M.2 PCIe3.0/4.0 SSDs for storage expansion.
- Consult a qualified technician for hardware upgrades to avoid damage and maintain warranty validity.

4. Troubleshooting

This section addresses common issues you might encounter with your Mini PC.

4.1 No Power

- Ensure the power adapter is securely connected to both the Mini PC and a working power outlet.
- Verify the power outlet is functional by plugging in another device.
- Check if the power adapter's indicator light (if any) is on.

4.2 No Display Output

- Confirm that the monitor is powered on and the correct input source is selected.
- Check the HDMI, DisplayPort, or USB-C cable connections between the Mini PC and the monitor. Try a different cable if possible.
- Test with a single monitor connection to isolate the issue.

4.3 Connectivity Issues (Wi-Fi/Bluetooth)

- **Wi-Fi:** Ensure your router is working correctly. Restart the router and the Mini PC. Check Wi-Fi settings in the operating system.
- **Bluetooth:** Ensure Bluetooth is enabled in the operating system settings. Re-pair your Bluetooth devices.

4.4 System Instability or Freezes

- Ensure the Mini PC has adequate ventilation and is not overheating.
- Update your operating system and device drivers to the latest versions.
- If issues persist, consider performing a system restore or reinstalling the operating system (back up your data first).
